

## iScribe Publish

### Secure Review, Edit, Approve, Search, Share, & EHR Population

#### PRODUCT OVERVIEW

iScribe's Publish is the core of our next generation tools and technology. It offers the capability to streamline the creation of medical documentation, lower costs, and increase physician productivity without negative consequences. Capture once, publish on demand to fax, printer PatientExchange or your EHR, PACS, or other HIE.

"The transition to HTML was easy. I love not having to worry about changes on my team's or my client's computers."

*Catherine Bishoff, President  
Maryland Transcription Service*

Anytime Anywhere Access

#### PUBLISH FEATURES

Access your patient records securely with any Internet connected device and a browser. Process records quickly and automatically route to the desired location whether it's the EHR, printer, fax or referring physician.

Features include:

- ✓ Anytime, anywhere secure access
- ✓ Review, edit, digitally sign, and archive
- ✓ Automatically print based on predefined rules
- ✓ Automatically fax based on queue, approval or on demand
- ✓ Securely exchange patient records with referring physicians using **PatientExchange**
- ✓ Detailed reporting and management statistics
- ✓ 24/7 Customer Support, Specialists and online Scribe "Wiki" Help System

### Publish User Interface Features:

Intuitive HTML editor makes it easy to interact with your records.

- ✓ Three folders – pending, inbox & archive
- ✓ Review, edit and digitally sign documents
- ✓ 'Google' like search
- ✓ Automatically transfer records to printer, fax, EHR and PatientExchange

### Publish Benefits:

- ✓ Reduce time to process records - documents open faster than using MS Word
- ✓ Reduce time and cost to process referral letters
- ✓ Increase inbound physician referrals
- ✓ Improve internal communication and access

### What is PatientExchange?

PatientExchange is a secure process that couples the sharing of patient information with messaging. Replace inefficient communication methods like email, fax, mail, messenger with direct and secure physician- to-physician or physician-to-patient communication.

PatientExchange drives physician referrals, which lead to increased business and improved healthcare delivery. PatientExchange is your healthcare information exchange that does not require expensive integrations.
